

Algebra Meals - 3 Meals, 2 Items (Simple Substitution, Simple Answer), to Answer

$$1 \text{ chicken} + 1 \text{ burger} = 7$$

What would the bottom meal cost?

$$1 \text{ chicken} + 2 \text{ burgers} = 11$$

$$1 \text{ burger} = ?$$

$$2 \text{ noodles} + 2 \text{ donuts} = 14$$

What would the bottom meal cost?

$$2 \text{ noodles} + 2 \text{ donuts} = 12$$

$$1 \text{ donut} = ?$$

$$3 \text{ donuts} + 2 \text{ fries} = 12$$

What would the bottom meal cost?

$$2 \text{ donuts} + 4 \text{ fries} = 18$$

$$1 \text{ fries} = ?$$

$$4 \text{ apples} + 4 \text{ noodles} = 20$$

What would the bottom meal cost?

$$4 \text{ apples} + 4 \text{ noodles} = 24$$

$$1 \text{ noodles} = ?$$

$$5 \text{ fries} + 4 \text{ pizzas} = 20$$

What would the bottom meal cost?

$$4 \text{ fries} + 2 \text{ pizzas} = 16$$

$$1 \text{ pizza} = ?$$

$$6 \text{ burgers} + 4 \text{ salads} = 32$$

What would the bottom meal cost?

$$3 \text{ burgers} + 2 \text{ salads} = 20$$

$$1 \text{ salad} = ?$$

$$7 \text{ donuts} + 4 \text{ pizzas} = 16$$

What would the bottom meal cost?

$$1 \text{ donut} + 2 \text{ pizzas} = 6$$

$$1 \text{ pizza} = ?$$

$$8 \text{ burgers} + 3 \text{ donuts} = 27$$

What would the bottom meal cost?

$$1 \text{ burger} + 4 \text{ donuts} = 24$$

$$1 \text{ donut} = ?$$
