Angles - Complementary, Supplementary, Opposite, Corresponding - Name to Rule

Name _____

1

Angles x and y are complementary

What do we know about a complementary pair of angles?

A	Angles x and y add to 90º
B	Angles x and y are identical
C	Angles x and y don't determine each other

2

Angles x and y are supplementary

What do we know about a supplementary pair of angles?

A	Angles x and y add to 180º
B	Angles x and y are identical
C	Angles x and y add to 90º

3

Angles x and y are opposite

What do we know about an opposite pair of angles?

A	Angles x and y are identical
B	Angles x and y don't determine each other
C	Angles x and y add to 90º

4

Angles x and y are corresponding

What do we know about a corresponding pair of angles?

A	Angles x and y add to 90º
B	Angles x and y are identical
C	Angles x and y add to 180º

5

Angles x and y are adjacent

What do we know about an adjacent pair of angles?

A	Angles x and y add to 90º
B	Angles x and y don't determine each other
C	Angles x and y add to 180º
