

Digit Solving - Long Division - One Step, With Remainder - Identify Subtraction

1

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 7 \\ 2 \overline{)15} \\ \underline{?} \\ 1 \end{array}$$

A	B	C
20	8	17
D	E	F
14	9	11

2

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 4 \\ 8 \overline{)33} \\ \underline{?} \\ 1 \end{array}$$

A	B	C
56	23	32
D	E	F
14	17	29

3

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 2 \\ 4 \overline{)11} \\ \underline{?} \\ 3 \end{array}$$

A	B	C
17	8	5
D	E	F
4	0	11

4

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 4 \\ 5 \overline{)22} \\ \underline{?} \\ 2 \end{array}$$

A	B	C
34	22	0
D	E	F
20	10	6

5

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 2 \\ 4 \overline{)10} \\ \underline{?} \\ 2 \end{array}$$

A	B	C
15	14	6
D	E	F
8	10	2

6

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 8 \\ 4 \overline{)34} \\ \underline{?} \\ 2 \end{array}$$

A	B	C
44	5	2
D	E	F
26	8	32

7

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 8 \\ 7 \overline{)58} \\ \underline{?} \\ 2 \end{array}$$

A	B	C
46	6	56
D	E	F
66	26	71

8

Find this missing value
for the subtracted value
in this long division

$$\begin{array}{r} 5 \\ 5 \overline{)28} \\ \underline{?} \\ 3 \end{array}$$

A	B	C
39	31	43
D	E	F
25	15	41
