Division by Skip Counting - Problem to Quotient

Name

1 How many boxes would have 28 crayons total?

28 crayons

= 7 crayons

A	B	C
2	0	4

D	E	
1	8	

2 How many boxes would have 56 crayons total?

56 crayons

= 7 crayons

A	B	C
12	10	11

D	E	
8	6	

3 How many boxes would have 21 crayons total?

21 crayons

= 7 crayons

A	B	C
3	1	0

D	E	
6	7	

4 How many constellations would have 35 stars total?

35 stars

= 7 stars

A	B	C
5	1	2

D	E	
7	3	

5 How many boxes would have 42 crayons total?

42 crayons

= 7 crayons

A	B	C
8	9	10

D	E	
4	6	

6 How many constellations would have 42 stars total?

42 stars

= 7 stars

A	B	C
4	2	1

D	E	
6	10	

7 How many constellations would have 49 stars total?

49 stars

= 7 stars

A	B	C
9	3	11

D	E	
7	5	

8 How many boxes would have 63 crayons total?

63 crayons

= 7 crayons

A	B	C
11	5	13

D	E	
6	9
