

Division as Fraction - With Remainder 2 x 1

1 Divide these numbers and find the remainder if any

$$\begin{array}{r} 10 \\ 5 \end{array}$$

- A 4 remainder 2
- B 3 remainder 4
- C 2 remainder 3
- D 6 remainder 2
- E 2 remainder 0
- F 4 remainder 3

2 Divide these numbers and find the remainder if any

$$\begin{array}{r} 11 \\ 5 \end{array}$$

- A 3 remainder 1
- B 5 remainder 4
- C 1 remainder 5
- D 2 remainder 1
- E 2 remainder 4
- F 3 remainder 4

3 Divide these numbers and find the remainder if any

$$\begin{array}{r} 12 \\ 5 \end{array}$$

- A 1 remainder 0
- B 4 remainder 2
- C 2 remainder 2
- D 0 remainder 6
- E 3 remainder 4
- F 1 remainder 2

4 Divide these numbers and find the remainder if any

$$\begin{array}{r} 14 \\ 7 \end{array}$$

- A 5 remainder 4
- B 3 remainder 3
- C 5 remainder 2
- D 2 remainder 0
- E 2 remainder 3
- F 3 remainder 2

5 Divide these numbers and find the remainder if any

$$\begin{array}{r} 16 \\ 8 \end{array}$$

- A 1 remainder 3
- B 2 remainder 0
- C 2 remainder 5
- D 2 remainder 3
- E 3 remainder 3
- F 1 remainder 2

6 Divide these numbers and find the remainder if any

$$\begin{array}{r} 12 \\ 4 \end{array}$$

- A 0 remainder 0
- B 5 remainder 3
- C 7 remainder 0
- D 7 remainder 2
- E 1 remainder 5
- F 3 remainder 0

7 Divide these numbers and find the remainder if any

$$\begin{array}{r} 12 \\ 6 \end{array}$$

- A 3 remainder 1
- B 5 remainder 3
- C 2 remainder 2
- D 4 remainder 2
- E 2 remainder 0
- F 1 remainder 1

8 Divide these numbers and find the remainder if any

$$\begin{array}{r} 13 \\ 6 \end{array}$$

- A 3 remainder 4
- B 5 remainder 4
- C 5 remainder 3
- D 4 remainder 1
- E 2 remainder 1
- F 4 remainder 4
