

Fraction Addition - Problem Simplification - Mixed - Two Changed Denominators

1 Set up this fraction addition problem correctly $2\frac{4}{5} + \frac{2}{3}$	A $2\frac{12}{15} + 1\frac{3}{3}$	B $3\frac{1}{3} + \frac{2}{3}$	C $2\frac{12}{15} + \frac{10}{15}$
2 Set up this fraction addition problem correctly $2\frac{7}{11} + 1\frac{2}{3}$	A $4\frac{1}{3} + 1\frac{2}{3}$	B $2\frac{21}{33} + 1\frac{22}{33}$	C $2\frac{24}{33} + 1\frac{22}{33}$
3 Set up this fraction addition problem correctly $3\frac{4}{11} + 1\frac{2}{7}$	A $3\frac{35}{77} + 1\frac{22}{77}$	B $3\frac{32}{88} + 1\frac{22}{88}$	C $3\frac{28}{77} + 1\frac{22}{77}$
4 Set up this fraction addition problem correctly $2\frac{10}{11} + 1\frac{2}{3}$	A $5\frac{1}{3} + 1\frac{2}{3}$	B $2\frac{30}{33} + 1\frac{22}{33}$	C $2\frac{30}{33} + 2$
5 Set up this fraction addition problem correctly $3\frac{4}{5} + 1\frac{4}{7}$	A $3\frac{4}{7} + 1\frac{4}{7}$	B $3\frac{32}{40} + 1\frac{20}{40}$	C $3\frac{28}{35} + 1\frac{20}{35}$
6 Set up this fraction addition problem correctly $3\frac{4}{7} + \frac{2}{3}$	A $3\frac{12}{21} + 1\frac{3}{21}$	B $3\frac{12}{21} + \frac{14}{21}$	C $3\frac{12}{24} + \frac{16}{24}$
7 Set up this fraction addition problem correctly $1\frac{2}{3} + \frac{2}{5}$	A $1\frac{4}{6} + \frac{2}{6}$	B $1\frac{10}{15} + \frac{6}{15}$	C $1\frac{10}{20} + \frac{8}{20}$
8 Set up this fraction addition problem correctly $1\frac{2}{11} + \frac{3}{5}$	A $1\frac{10}{55} + \frac{33}{55}$	B $1\frac{10}{60} + \frac{36}{60}$	C $1\frac{15}{55} + \frac{33}{55}$
