

## Fraction Comparison - Basic - One Changed Denominator

<b>1</b> Compare these fractions and choose the right equality operator $\frac{2}{3} \bigcirc \frac{2}{9}$ <, >, or =?	A <	B >	C =
<b>2</b> Compare these fractions and choose the right equality operator $\frac{2}{5} \bigcirc \frac{8}{15}$ <, >, or =?	A <	B >	C =
<b>3</b> Compare these fractions and choose the right equality operator $\frac{1}{7} \bigcirc \frac{6}{21}$ <, >, or =?	A <	B >	C =
<b>4</b> Compare these fractions and choose the right equality operator $\frac{5}{7} \bigcirc \frac{5}{21}$ <, >, or =?	A <	B >	C =
<b>5</b> Compare these fractions and choose the right equality operator $\frac{2}{3} \bigcirc \frac{6}{9}$ <, >, or =?	A <	B >	C =
<b>6</b> Compare these fractions and choose the right equality operator $\frac{2}{7} \bigcirc \frac{3}{14}$ <, >, or =?	A <	B >	C =
<b>7</b> Compare these fractions and choose the right equality operator $\frac{2}{5} \bigcirc \frac{6}{10}$ <, >, or =?	A <	B >	C =
<b>8</b> Compare these fractions and choose the right equality operator $\frac{3}{5} \bigcirc \frac{6}{15}$ <, >, or =?	A <	B >	C =
