

Fraction Comparison - Problem Simplification - Basic - Two Changed Denominators

<p>1 Set this fraction comparison problem up correctly</p> $\frac{1}{11} \bigcirc \frac{2}{7}$	<p>A $\frac{7}{77} \bigcirc \frac{33}{77}$ $\frac{7}{77} \bigcirc \frac{22}{77}$</p> <p>C $\frac{7}{84} \bigcirc \frac{24}{84}$</p>	<p>2 Set this fraction comparison problem up correctly</p> $\frac{1}{3} \bigcirc \frac{2}{11}$	<p>A $\frac{11}{33} \bigcirc \frac{6}{33}$ $\frac{4}{12} \bigcirc \frac{2}{12}$</p> <p>C $\frac{11}{33} \bigcirc \frac{9}{33}$</p>
<p>3 Set this fraction comparison problem up correctly</p> $\frac{1}{2} \bigcirc \frac{3}{5}$	<p>A $\frac{1}{10} \bigcirc \frac{6}{10}$ $\frac{5}{10} \bigcirc \frac{6}{10}$</p> <p>C $\frac{1}{5} \bigcirc \frac{3}{5}$</p>	<p>4 Set this fraction comparison problem up correctly</p> $\frac{4}{7} \bigcirc \frac{1}{2}$	<p>A $\frac{8}{14} \bigcirc \frac{7}{14}$ $\frac{10}{14} \bigcirc \frac{7}{14}$</p> <p>C $\frac{4}{8} \bigcirc \frac{4}{8}$</p>
<p>5 Set this fraction comparison problem up correctly</p> $\frac{3}{11} \bigcirc \frac{1}{2}$	<p>A $\frac{6}{22} \bigcirc \frac{11}{22}$ $\frac{3}{12} \bigcirc \frac{6}{12}$</p> <p>C $\frac{8}{22} \bigcirc \frac{11}{22}$</p>	<p>6 Set this fraction comparison problem up correctly</p> $\frac{2}{5} \bigcirc \frac{1}{2}$	<p>A $\frac{6}{15} \bigcirc \frac{5}{15}$ $\frac{6}{10} \bigcirc \frac{5}{10}$</p> <p>C $\frac{4}{10} \bigcirc \frac{5}{10}$</p>
<p>7 Set this fraction comparison problem up correctly</p> $\frac{1}{5} \bigcirc \frac{2}{3}$	<p>A $\frac{1}{6} \bigcirc \frac{4}{6}$ $\frac{1}{3} \bigcirc \frac{2}{3}$</p> <p>C $\frac{3}{15} \bigcirc \frac{10}{15}$</p>	<p>8 Set this fraction comparison problem up correctly</p> $\frac{1}{2} \bigcirc \frac{3}{11}$	<p>A $\frac{11}{22} \bigcirc \frac{6}{22}$ $\frac{11}{22} \bigcirc \frac{8}{22}$</p> <p>C $\frac{6}{12} \bigcirc \frac{3}{12}$</p>
