

## Fraction Division - Simple by Whole Concept Intro - Picture to Answer - Don't

### Simplify

<p><b>1</b> What is the result of dividing <math>\frac{2}{6}</math> by 3? Don't simplify the answer</p>  <p><math>\frac{2}{6}</math>      <math>\frac{2}{6} \div 3</math></p>	<p>A <math>\frac{3}{3}</math></p>	<p>B <math>\frac{2}{18}</math></p>	<p>C <math>\frac{3}{18}</math></p>	<p><b>2</b> What is the result of dividing <math>\frac{5}{6}</math> by 3? Don't simplify the answer</p>  <p><math>\frac{5}{6}</math>      <math>\frac{5}{6} \div 3</math></p>	<p>A <math>\frac{5}{18}</math></p>	<p>B <math>\frac{6}{9}</math></p>	<p>C <math>\frac{15}{6}</math></p>				
<p><b>3</b> What is the result of dividing <math>\frac{4}{6}</math> by 3? Don't simplify the answer</p>  <p><math>\frac{4}{6}</math>      <math>\frac{4}{6} \div 3</math></p>	<p>A <math>\frac{5}{6}</math></p>	<p>B <math>\frac{5}{9}</math></p>	<p>C <math>\frac{5}{3}</math></p>	<p><b>4</b> What is the result of dividing <math>\frac{3}{6}</math> by 3? Don't simplify the answer</p>  <p><math>\frac{3}{6}</math>      <math>\frac{3}{6} \div 3</math></p>	<p>A <math>\frac{4}{6}</math></p>	<p>B <math>\frac{4}{9}</math></p>	<p>C <math>\frac{3}{18}</math></p>				
<p>D <math>\frac{3}{9}</math></p>	<p>E <math>\frac{6}{6}</math></p>	<p>F <math>\frac{3}{6}</math></p>	<p>D <math>\frac{6}{3}</math></p>	<p>E <math>\frac{6}{18}</math></p>	<p>F <math>\frac{6}{6}</math></p>	<p>D <math>\frac{4}{18}</math></p>	<p>E <math>\frac{12}{6}</math></p>	<p>F <math>\frac{5}{18}</math></p>	<p>D <math>\frac{9}{6}</math></p>	<p>E <math>\frac{4}{18}</math></p>	<p>F <math>\frac{4}{3}</math></p>
