

Fraction Multiplication - Simple by Whole Concept Intro - Picture to Equation

1 Find the multiplication equation that represents this picture 	A $2 \times \frac{3}{7}$	B $2 \cdot \frac{3}{6}$	C $3 \times \frac{3}{7}$	2 Find the multiplication equation that represents this picture 	A $2 \cdot \frac{3}{5}$	B $2 \cdot \frac{2}{6}$	C $3 \times \frac{2}{5}$
	D $2 \cdot \frac{4}{7}$				D $2 \times \frac{2}{5}$		
3 Find the multiplication equation that represents this picture 	A $2 \cdot \frac{2}{6}$	B $2 \times \frac{2}{7}$	C $3 \times \frac{2}{7}$	4 Find the multiplication equation that represents this picture  	A $3 \cdot \frac{2}{6}$	B $3 \cdot \frac{3}{7}$	C $3 \times \frac{2}{7}$
	D $2 \cdot \frac{3}{7}$				D $2 \times \frac{2}{7}$
