

Fraction Concept Intro - Picture to Fraction, Mixed Fraction

1

What fraction would describe the number of pizzas?

A	$2\frac{3}{8}$	B	$2\frac{10}{8}$
---	----------------	---	-----------------

2

What fraction would describe the number of slices compared to a full pizza?

A	$\frac{8}{4}$	B	$\frac{2}{4}$
---	---------------	---	---------------

3

What fraction would describe the number of slices compared to a full pizza?

A	$\frac{4}{5}$	B	$\frac{1}{5}$
---	---------------	---	---------------

4

What fraction would describe the number of pizzas?

A	$2\frac{5}{3}$	B	$2\frac{2}{3}$
---	----------------	---	----------------

5

What fraction would describe the number of pizzas?

A	$2\frac{1}{5}$	B	$3\frac{1}{5}$
---	----------------	---	----------------

6

What fraction would describe the number of pizzas?

A	$2\frac{6}{7}$	B	$1\frac{6}{7}$
---	----------------	---	----------------

7

What fraction would describe the number of pizzas?

A	$1\frac{2}{5}$	B	$1\frac{2}{4}$
---	----------------	---	----------------

8

What fraction would describe the number of pizzas?

A	$1\frac{3}{5}$	B	$2\frac{3}{5}$
---	----------------	---	----------------
