

Fraction Concept Intro - Picture to Fraction, Simple Fraction

1

What fraction would describe the number of slices compared to a full pizza?

A $\frac{2}{14}$

B $\frac{2}{5}$

2

What fraction would describe the number of slices compared to a full pizza?

A $\frac{1}{5}$

B $\frac{3}{5}$

3

What fraction would describe the number of slices compared to a full pizza?

A $\frac{3}{6}$

B $\frac{6}{6}$

4

What fraction would describe the number of slices compared to a full pizza?

A $\frac{1}{3}$

B $\frac{7}{3}$

5

What fraction would describe the number of slices compared to a full pizza?

A $\frac{1}{16}$

B $\frac{1}{8}$

6

What fraction would describe the number of slices compared to a full pizza?

A $\frac{3}{6}$

B $\frac{3}{12}$

7

What fraction would describe the number of slices compared to a full pizza?

A $\frac{3}{5}$

B $\frac{6}{5}$

8

What fraction would describe the number of slices compared to a full pizza?

A $\frac{4}{5}$

B $\frac{1}{5}$
