1

$$\frac{1}{5} \times \frac{?}{?} = \frac{4}{20}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{4}{4}$	$\frac{8}{8}$

2

$$\frac{1}{6} \times \frac{?}{?} = \frac{4}{24}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{5}{5}$	$\frac{4}{4}$

3

$$\frac{1}{6} \times \frac{?}{?} = \frac{5}{30}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{5}{5}$	$\frac{12}{12}$

4

$$\frac{1}{5} \times \frac{?}{?} = \frac{5}{25}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{5}{5}$	$\frac{13}{13}$

5

$$\frac{1}{2} \times \frac{?}{?} = \frac{5}{10}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{5}{5}$	$\frac{2}{2}$

6

$$\frac{1}{3} \times \frac{?}{?} = \frac{5}{15}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{5}{5}$	$\frac{4}{4}$

7

$$\frac{1}{4} \times \frac{?}{?} = \frac{5}{20}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{5}{5}$	$\frac{6}{6}$

8

$$\frac{1}{3} \times \frac{?}{?} = \frac{4}{12}$$

Find the ratio that this equivalent fraction has been multiplied by

A	B
$\frac{4}{4}$	$\frac{5}{5}$
