

Function Composition Naming - Function to Name (First/Second)

1 What part of this composite function is $p(x)$?
given $p(m(x))$
 $p(x)$ is the ?

A
first function

B
second function

2 What part of this composite function is $b(x)$?
given $b(y(x))$
 $b(x)$ is the ?

A
first function

B
second function

3 What part of this composite function is $z(x)$?
given $z(r(x))$
 $z(x)$ is the ?

A
first function

B
second function

4 What part of this composite function is $c(x)$?
given $c(b(x))$
 $c(x)$ is the ?

A
first function

B
second function

5 What part of this composite function is $y(x)$?
given $b(y(x))$
 $y(x)$ is the ?

A
first function

B
second function

6 What part of this composite function is $y(x)$?
given $y(c(x))$
 $y(x)$ is the ?

A
first function

B
second function

7 What part of this composite function is $z(x)$?
given $m(z(x))$
 $z(x)$ is the ?

A
first function

B
second function

8 What part of this composite function is $c(x)$?
given $c(n(x))$
 $c(x)$ is the ?

A
first function

B
second function
