

Function Composition Naming - Name (Input/Output) to Function

1

What part of this composite function is the input function?

given $m(c(x))$
input function is?

A

 $m(x)$

B

 $c(x)$

2

What part of this composite function is the output function?

given $p(c(x))$
output function is?

A

 $p(x)$

B

 $c(x)$

3

What part of this composite function is the output function?

given $d(z(x))$
output function is?

A

 $d(x)$

B

 $z(x)$

4

What part of this composite function is the input function?

given $p(m(x))$
input function is?

A

 $p(x)$

B

 $m(x)$

5

What part of this composite function is the input function?

given $p(r(x))$
input function is?

A

 $r(x)$

B

 $p(x)$

6

What part of this composite function is the output function?

given $z(c(x))$
output function is?

A

 $z(x)$

B

 $c(x)$

7

What part of this composite function is the output function?

given $r(d(x))$
output function is?

A

 $d(x)$

B

 $r(x)$

8

What part of this composite function is the input function?

given $c(p(x))$
input function is?

A

 $c(x)$

B

 $p(x)$
