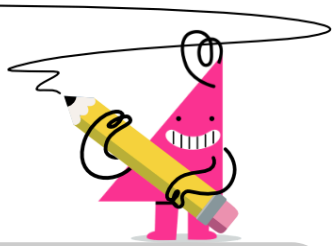
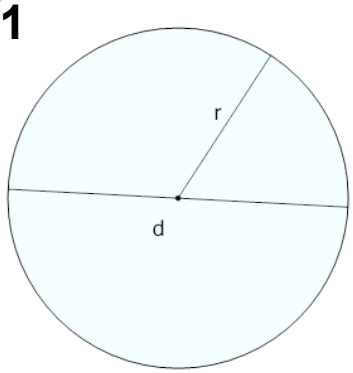
Name

# Circles - Rule to Find Radius from Diameter - Simple



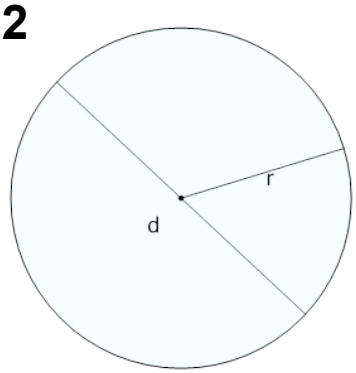
**1**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r and d add to 180 |
| B | r and d add to 90 |
| C | Nothing, r and d are not |
| D | r and d add to 360 |
| E | r is half of d |
| F | r is the same as d |

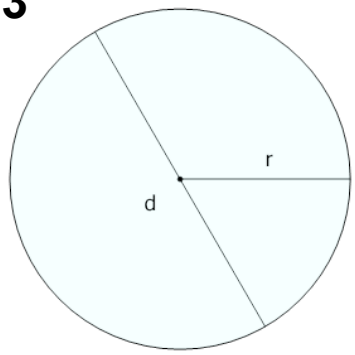
**2**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | Nothing, r and d are not |
| B | r is half of d |
| C | r is twice d |
| D | r and d add to 360 |
| E | r is the same as d |
| F | r and d add to 90 |

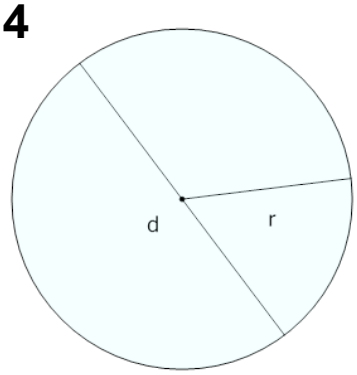
**3**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r is twice d |
| B | r and d add to 90 |
| C | r and d add to 360 |
| D | r is half of d |
| E | Nothing, r and d are not |
| F | r is the same as d |

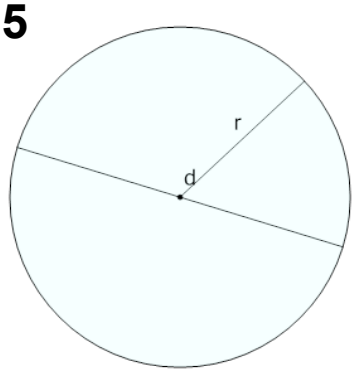
**4**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r and d add to 90 |
| B | r and d add to 360 |
| C | Nothing, r and d are not |
| D | r is twice d |
| E | r and d add to 180 |
| F | r is half of d |

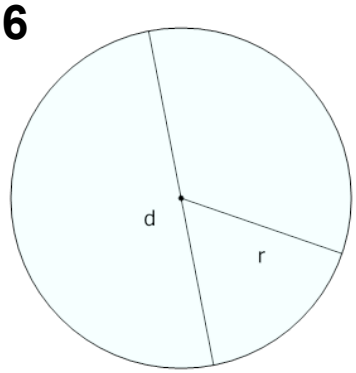
**5**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r is twice d |
| B | Nothing, r and d are not |
| C | r and d add to 180 |
| D | r is half of d |
| E | r is the same as d |
| F | r and d add to 90 |

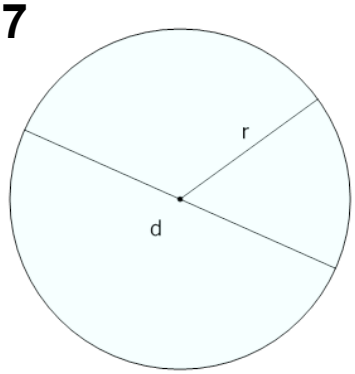
**6**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r and d add to 90 |
| B | r is twice d |
| C | r is the same as d |
| D | r is half of d |
| E | r and d add to 360 |
| F | Nothing, r and d are not |

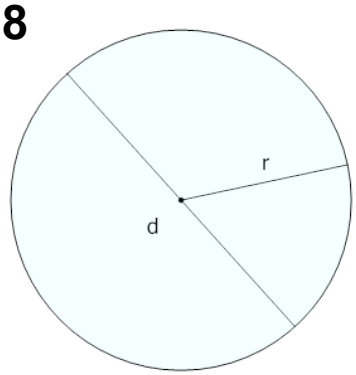
**7**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r and d add to 180 |
| B | r is twice d |
| C | r is half of d |
| D | r and d add to 360 |
| E | Nothing, r and d are not |
| F | r and d add to 90 |

**8**



If 'd' is the diameter, what is the radius 'r'?

| | |
|---|---|
| A | r and d add to 90 |
| B | r is the same as d |
| C | r is half of d |
| D | r and d add to 180 |
| E | Nothing, r and d are not |
| F | r and d add to 360 |
