

## Circles - Rule to Find Radius from Diameter - Simple

**1**

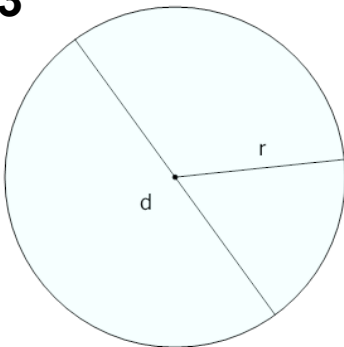

If 'd' is the diameter, what is the radius 'r'?

- A r is half of d
- B r and d add to 90
- C r and d add to 180
- D Nothing, r and d are not
- E r is the same as d
- F r and d add to 360

**2**

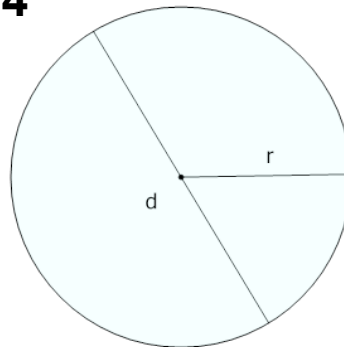

If 'd' is the diameter, what is the radius 'r'?

- A r and d add to 90
- B r and d add to 360
- C r and d add to 180
- D r is the same as d
- E Nothing, r and d are not
- F r is half of d

**3**

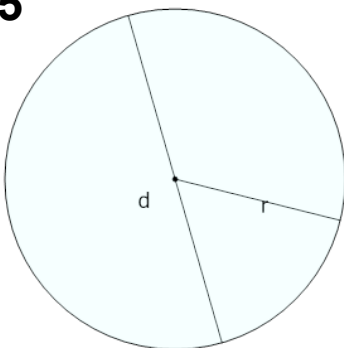

If 'd' is the diameter, what is the radius 'r'?

- A r is half of d
- B r and d add to 180
- C r is twice d
- D r and d add to 90
- E r and d add to 360
- F Nothing, r and d are not

**4**

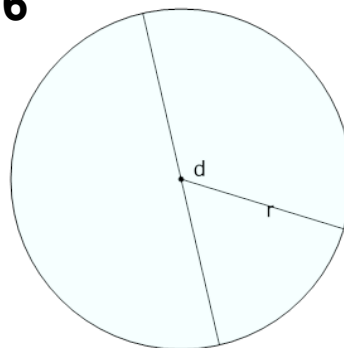

If 'd' is the diameter, what is the radius 'r'?

- A r is half of d
- B Nothing, r and d are not
- C r is the same as d
- D r and d add to 180
- E r and d add to 90
- F r is twice d

**5**

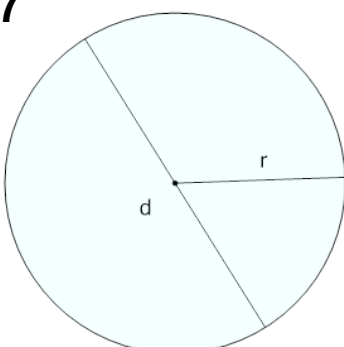

If 'd' is the diameter, what is the radius 'r'?

- A r is the same as d
- B r and d add to 90
- C Nothing, r and d are not
- D r is twice d
- E r is half of d
- F r and d add to 180

**6**

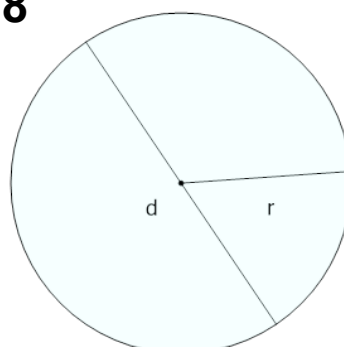

If 'd' is the diameter, what is the radius 'r'?

- A Nothing, r and d are not
- B r is half of d
- C r and d add to 180
- D r and d add to 90
- E r and d add to 360
- F r is the same as d

**7**

If 'd' is the diameter, what is the radius 'r'?

- A r and d add to 360
- B r is half of d
- C Nothing, r and d are not
- D r and d add to 90
- E r is twice d
- F r and d add to 180

**8**

If 'd' is the diameter, what is the radius 'r'?

- A r and d add to 90
- B r and d add to 180
- C r is half of d
- D r is the same as d
- E r is twice d
- F Nothing, r and d are not
