

Geometry of Circles - Radius Tangent Angle Rule

1 What geometry rule would help find angle T?

(not to scale)

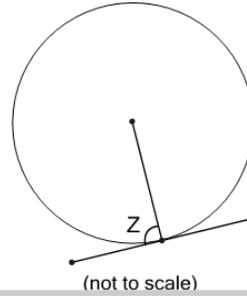

A Angle T will always be 180°

B Angle T will always be 45°

C Angle T will always be 90°

D Angle T will always be 60°

2 What geometry rule would help find angle Z?

(not to scale)

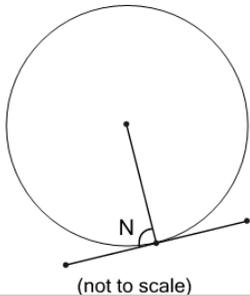

A Angle Z will always be 45°

B Angle Z will always be 180°

C Angle Z will always be 90°

D Angle Z will always be 60°

3 What geometry rule would help find angle N?

(not to scale)

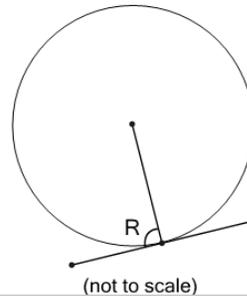

A Angle N will always be 90°

B Angle N will always be 60°

C Angle N will always be 45°

D Angle N will always be 180°

4 What geometry rule would help find angle R?

(not to scale)

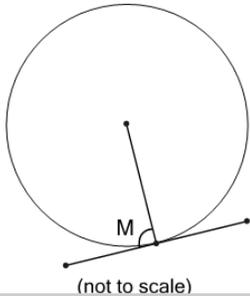

A Angle R will always be 90°

B Angle R will always be 60°

C Angle R will always be 45°

D Angle R will always be 180°

5 What geometry rule would help find angle M?

(not to scale)

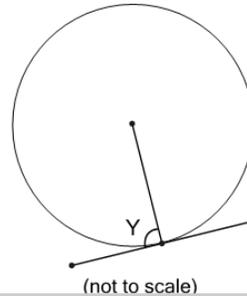

A Angle M will always be 180°

B Angle M will always be 90°

C Angle M will always be 60°

D Angle M will always be 45°

6 What geometry rule would help find angle Y?

(not to scale)

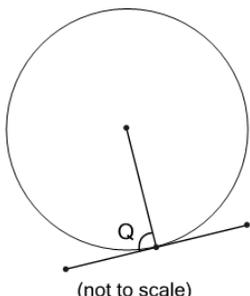

A Angle Y will always be 180°

B Angle Y will always be 45°

C Angle Y will always be 90°

D Angle Y will always be 60°

7 What geometry rule would help find angle Q?

(not to scale)

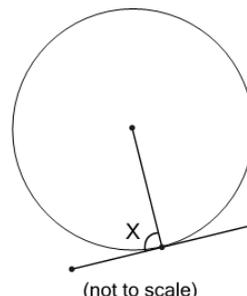

A Angle Q will always be 180°

B Angle Q will always be 60°

C Angle Q will always be 90°

D Angle Q will always be 45°

8 What geometry rule would help find angle X?

(not to scale)

A Angle X will always be 60°

B Angle X will always be 90°

C Angle X will always be 180°

D Angle X will always be 45°
