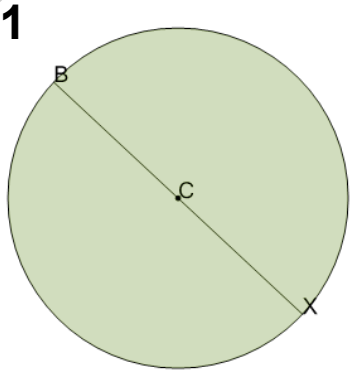
Name

Circles - Rule to Find Diameter from Radius

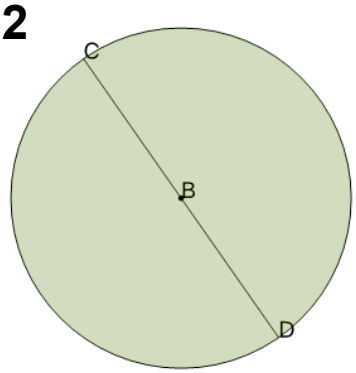
1



What is known about diameter BCX given radius CX

A	BCX is the same as CX
B	BCX is twice CX
C	BCX and CX add to 360
D	BCX and CX add to 90
E	BCX and CX add to 180
F	Nothing, BCX and CX

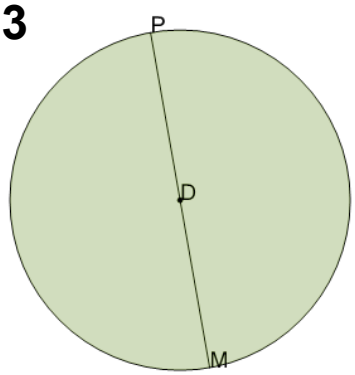
2



What is known about diameter CBD given radius BD

A	CBD and BD add to 90
B	CBD is twice BD
C	Nothing, CBD and BD
D	CBD and BD add to 360
E	CBD and BD add to 180
F	CBD is the same as BD

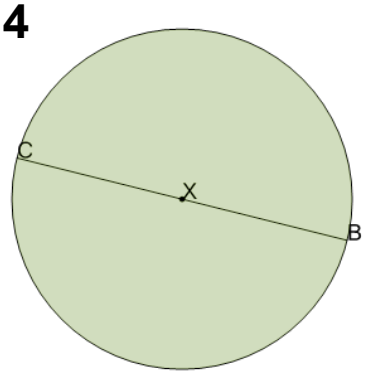
3



What is known about diameter PDM given radius DM

A	PDM is twice DM
B	PDM is the same as DM
C	PDM and DM add to 90
D	PDM is half of DM
E	PDM and DM add to 360
F	Nothing, PDM and DM

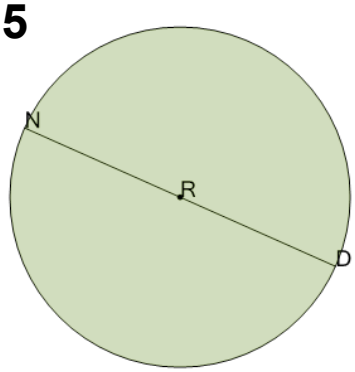
4



What is known about diameter CXB given radius XB

A	CXB is twice XB
B	CXB is the same as XB
C	CXB is half of XB
D	CXB and XB add to 90
E	CXB and XB add to 360
F	Nothing, CXB and XB

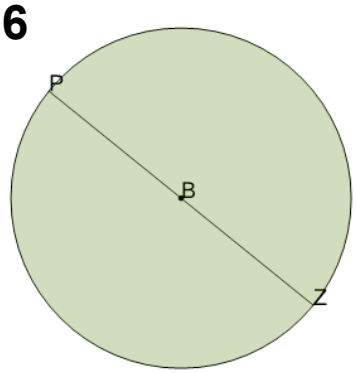
5



What is known about diameter NRD given radius RD

A	NRD and RD add to 360
B	NRD is twice RD
C	NRD and RD add to 180
D	NRD is the same as RD
E	NRD and RD add to 90
F	Nothing, NRD and RD

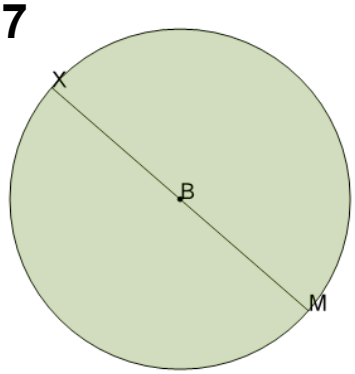
6



What is known about diameter PBZ given radius BZ

A	PBZ and BZ add to 90
B	PBZ is twice BZ
C	PBZ is the same as BZ
D	Nothing, PBZ and BZ
E	PBZ and BZ add to 180
F	PBZ is half of BZ

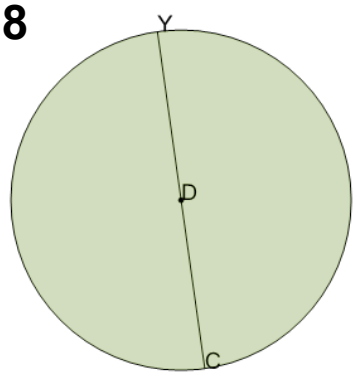
7



What is known about diameter XBM given radius BM

A	XBM is half of BM
B	XBM is twice BM
C	XBM and BM add to 360
D	XBM and BM add to 180
E	Nothing, XBM and BM
F	XBM is the same as BM

8



What is known about diameter YDC given radius DC

A	Nothing, YDC and DC
B	YDC is twice DC
C	YDC and DC add to 360
D	YDC and DC add to 180
E	YDC is half of DC
F	YDC and DC add to 90
