

Linear Equations - Find X Intercept (Decimal) - Standard Form

1 Find the x intercept of this function by setting y to zero and solving

$$-5x + 1y = -0.5$$

A	B	C	D	E	F
-0.7	0.1	2.4	0.9	3.1	-2.9

2 Find the x intercept of this function by setting y to zero and solving

$$-12x - 2y = -13.8$$

A	B	C	D	E	F
1.9	-1.9	4.2	2.7	0.4	1.2

3 Find the x intercept of this function by setting y to zero and solving

$$8x - 4y = -23.3$$

A	B	C	D	E	F
-1.4	0.1	-3.7	-2.9	-4.4	-2.2

4 Find the x intercept of this function by setting y to zero and solving

$$-10x + 2y = -7.6$$

A	B	C	D	E	F
-0.8	3.8	0.8	1.5	0	-2.3

5 Find the x intercept of this function by setting y to zero and solving

$$10x - 2y = 10.5$$

A	B	C	D	E	F
0.3	-0.5	1.8	1.1	-1.2	-2

6 Find the x intercept of this function by setting y to zero and solving

$$-24x - 4y = -3.9$$

A	B	C	D	E	F
2.4	-2.1	0.2	0.9	-2.9	-1.4

7 Find the x intercept of this function by setting y to zero and solving

$$-42x + 6y = 6.1$$

A	B	C	D	E	F
2.1	-0.9	2.9	-3.2	-0.1	1.4

8 Find the x intercept of this function by setting y to zero and solving

$$-21x + 3y = -2.1$$

A	B	C	D	E	F
2.4	-1.4	-2.9	0.1	-0.7	0.9
