

## Rise of a Line from Coordinates of Points

**1** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(4, 5)$  and  $(8, 3)$

A	B	C	D	E	F
-3.2	-0.8	-6	2	1.2	-2

**2** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(0, 3)$  and  $(2, 7)$

A	B	C	D	E	F
-4	8	12	2	1.6	4

**3** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(1, 4)$  and  $(6, 8)$

A	B	C	D	E	F
12	5	4	-4	11.2	8

**4** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(3, 4)$  and  $(8, 2)$

A	B	C	D	E	F
-0.4	-2	2	-2.4	5	-5.2

**5** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(4, 5)$  and  $(7, 2)$

A	B	C	D	E	F
-3.6	1.2	-0.6	3	0	-3

**6** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(6, 9)$  and  $(5, 7)$

A	B	C	D	E	F
-2	-5.2	2	-0.4	0.8	-1

**7** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(5, 4)$  and  $(6, 9)$

A	B	C	D	E	F
-1	5	-5	13	1	-3

**8** Find the rise of the line (change in  $y$ ) between the two  $(x, y)$  points

$(10, 9)$  and  $(7, 9)$

A	B
-3	0
