

Multiplication Algorithm 2x1 With Carry - Step 1

1 Multiply 7 and 5 to find the ones value of the product.

$$\begin{array}{r} \square \\ 97 \\ \times 5 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 7 | 2 | 0 |
| D | E | F |
| 5 | 4 | 6 |

2 Multiply 4 and 4 to find the ones value of the product.

$$\begin{array}{r} \square \\ 84 \\ \times 4 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 6 | 8 | 9 |
| D | E | F |
| 0 | 4 | 2 |

3 Multiply 9 and 4 to find the ones value of the product.

$$\begin{array}{r} \square \\ 99 \\ \times 4 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 4 | 1 | 8 |
| D | E | F |
| 6 | 5 | 3 |

4 Multiply 3 and 7 to find the ones value of the product.

$$\begin{array}{r} \square \\ 33 \\ \times 7 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 5 | 1 | 9 |
| D | E | F |
| 7 | 8 | 4 |

5 Multiply 8 and 4 to find the ones value of the product.

$$\begin{array}{r} \square \\ 48 \\ \times 4 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 4 | 7 | 2 |
| D | E | F |
| 9 | 0 | 6 |

6 Multiply 8 and 5 to find the ones value of the product.

$$\begin{array}{r} \square \\ 88 \\ \times 5 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 6 | 2 | 8 |
| D | E | F |
| 1 | 0 | 5 |

7 Multiply 3 and 9 to find the ones value of the product.

$$\begin{array}{r} \square \\ 23 \\ \times 9 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 6 | 2 | 9 |
| D | E | F |
| 7 | 5 | 4 |

8 Multiply 3 and 7 to find the ones value of the product.

$$\begin{array}{r} \square \\ 83 \\ \times 7 \\ \hline \square \square ? \end{array}$$

| | | |
|---|---|---|
| A | B | C |
| 0 | 1 | 5 |
| D | E | F |
| 7 | 9 | 4 |
