

Order of Operations Example - Add, Subtract with Exponents

1 Which operation should be done first in this equation?

$$4 - 3 + 6^2 = ?$$

A $4 - 3$

B 6^2

C $3 + 6$

2 Which operation should be done first in this equation?

$$8 + 3^2 - 5 = ?$$

A 3^2

B $3 - 5$

C $8 + 3$

3 Which operation should be done first in this equation?

$$9 + 6^2 - 2 = ?$$

A $6 - 2$

B $9 + 6$

C 6^2

4 Which operation should be done first in this equation?

$$9 - 4 + 2^2 = ?$$

A $4 + 2$

B 2^2

C $9 - 4$

5 Which operation should be done first in this equation?

$$9 - 6 + 2^2 = ?$$

A $9 - 6$

B $6 + 2$

C 2^2

6 Which operation should be done first in this equation?

$$8 - 2 + 6^2 = ?$$

A $2 + 6$

B 6^2

C $8 - 2$

7 Which operation should be done first in this equation?

$$8 - 6 + 3^2 = ?$$

A $6 + 3$

B $8 - 6$

C 3^2

8 Which operation should be done first in this equation?

$$4 - 5 + 2^2 = ?$$

A 2^2

B $5 + 2$

C $4 - 5$
