

Order of Operations Example - Add, Subtract with Parentheses

1

Which operation should be done first in this equation?

$$9 - (6 + 7) = ?$$

A

B

$$9 - 6 \quad 6 + 7$$

2

Which operation should be done first in this equation?

$$7 - (5 + 3) = ?$$

A

B

$$5 + 3 \quad 7 - 5$$

3

Which operation should be done first in this equation?

$$8 - (7 + 2) = ?$$

A

B

$$8 - 7 \quad 7 + 2$$

4

Which operation should be done first in this equation?

$$8 - (3 + 2) = ?$$

A

B

$$3 + 2 \quad 8 - 3$$

5

Which operation should be done first in this equation?

$$9 - (7 + 2) = ?$$

A

B

$$7 + 2 \quad 9 - 7$$

6

Which operation should be done first in this equation?

$$3 + (2 - 7) = ?$$

A

B

$$3 + 2 \quad 2 - 7$$

7

Which operation should be done first in this equation?

$$9 + (5 - 4) = ?$$

A

B

$$9 + 5 \quad 5 - 4$$

8

Which operation should be done first in this equation?

$$(7 + 4) - 5 = ?$$

A

B

$$4 - 5 \quad 7 + 4$$
