

Order of Operations Example - Add, Subtract

1

Which operation should be done first in this equation?

$$9 + 4 - 7 = ?$$

A

B

$$9 + 4 \quad 4 - 7$$

2

Which operation should be done first in this equation?

$$5 + 7 - 3 = ?$$

A

B

$$7 - 3 \quad 5 + 7$$

3

Which operation should be done first in this equation?

$$8 + 6 - 5 = ?$$

A

B

$$6 - 5 \quad 8 + 6$$

4

Which operation should be done first in this equation?

$$5 + 4 - 2 = ?$$

A

B

$$5 + 4 \quad 4 - 2$$

5

Which operation should be done first in this equation?

$$8 + 2 - 3 = ?$$

A

B

$$2 - 3 \quad 8 + 2$$

6

Which operation should be done first in this equation?

$$9 - 3 + 2 = ?$$

A

B

$$9 - 3 \quad 3 + 2$$

7

Which operation should be done first in this equation?

$$8 - 6 + 5 = ?$$

A

B

$$8 - 6 \quad 6 + 5$$

8

Which operation should be done first in this equation?

$$9 + 4 - 3 = ?$$

A

B

$$9 + 4 \quad 4 - 3$$
