

Quadratics Vertex Form - Graph to Vertex

1 What could the vertex of this function be?

- | | | | |
|---|----------|---|---------|
| A | (-2, 2) | B | (2, 2) |
| C | (-2, -2) | D | (2, -2) |

2 What could the vertex of this function be?

- | | | | |
|---|----------|---|---------|
| A | (-2, -1) | B | (2, -1) |
| C | (2, 1) | D | (-2, 1) |

3 What could the vertex of this function be?

- | | | | |
|---|---------|---|----------|
| A | (-4, 2) | B | (4, -2) |
| C | (4, 2) | D | (-4, -2) |

4 What could the vertex of this function be?

- | | | | |
|---|----------|---|---------|
| A | (2, -3) | B | (2, 3) |
| C | (-2, -3) | D | (-2, 3) |

5 What could the vertex of this function be?

- | | | | |
|---|----------|---|---------|
| A | (-2, 4) | B | (2, -4) |
| C | (-2, -4) | D | (2, 4) |

6 What could the vertex of this function be?

- | | | | |
|---|---------|---|----------|
| A | (3, -1) | B | (3, 1) |
| C | (-3, 1) | D | (-3, -1) |

7 What could the vertex of this function be?

- | | | | |
|---|---------|---|----------|
| A | (2, -4) | B | (-2, -4) |
| C | (2, 4) | D | (-2, 4) |

8 What could the vertex of this function be?

- | | | | |
|---|----------|---|---------|
| A | (-2, -2) | B | (-2, 2) |
| C | (2, -2) | D | (2, 2) |
