

## Quadratic Formulas - Name to Formula

A

$\Delta = b^2 - 4ac$

2

X Coordinate of Vertex

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

A  $\Delta = b^2 - 4ac$

$$\text{B} \quad x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

C  $x = \frac{-b}{2a}$

## Quadratic Formula

$$\text{A} \quad x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

|   |                      |
|---|----------------------|
| B | $\Delta = b^2 - 4ac$ |
|---|----------------------|

|   |                     |
|---|---------------------|
| C | $x = \frac{-b}{2a}$ |
|---|---------------------|
