

Radicals - Fraction by Fraction Division to Answer - Integer

1 What integer does this radical expression simplify to?

$$\sqrt{\frac{33}{2} \div \frac{6}{44}}$$

A	B	C
10	20	4
D	E	F
11	7	9

2 What integer does this radical expression simplify to?

$$\sqrt{\frac{20}{3} \div \frac{12}{45}}$$

A	B	C
5	1	10
D	E	F
2	4	14

3 What integer does this radical expression simplify to?

$$\sqrt{\frac{56}{12} \div \frac{2}{21}}$$

A	B	C
13	7	4
D	E	F
1	3	5

4 What integer does this radical expression simplify to?

$$\sqrt{\frac{10}{3} \div \frac{4}{30}}$$

A	B	C
1	5	9
D	E	F
4	3	11

5 What integer does this radical expression simplify to?

$$\sqrt{\frac{27}{6} \div \frac{3}{6}}$$

A	B	C
6	7	3
D	E	F
11	8	5

6 What integer does this radical expression simplify to?

$$\sqrt{\frac{10}{8} \div \frac{2}{40}}$$

A	B	C
10	7	5
D	E	F
12	13	1

7 What integer does this radical expression simplify to?

$$\sqrt{\frac{10}{4} \div \frac{8}{80}}$$

A	B	C
6	1	4
D	E	F
3	5	11

8 What integer does this radical expression simplify to?

$$\sqrt{\frac{21}{4} \div \frac{6}{56}}$$

A	B	C
7	1	14
D	E	F
3	11	15
