

Radicals - Integer by Fraction Division to Answer - Integer

1 What integer does this radical expression simplify to?

$$\sqrt{15 \div \frac{12}{20}}$$

A	B	C
10	1	2
D	E	F
5	14	4

2 What integer does this radical expression simplify to?

$$\sqrt{22 \div \frac{8}{44}}$$

A	B	C
14	5	2
D	E	F
13	11	19

3 What integer does this radical expression simplify to?

$$\sqrt{44 \div \frac{16}{44}}$$

A	B	C
17	16	11
D	E	F
1	15	4

4 What integer does this radical expression simplify to?

$$\sqrt{21 \div \frac{6}{14}}$$

A	B	C
13	4	12
D	E	F
3	7	1

5 What integer does this radical expression simplify to?

$$\sqrt{33 \div \frac{12}{44}}$$

A	B	C
11	16	19
D	E	F
2	13	18

6 What integer does this radical expression simplify to?

$$\sqrt{12 \div \frac{16}{12}}$$

A	B	C
1	3	8
D	E	F
9	5	2

7 What integer does this radical expression simplify to?

$$\sqrt{28 \div \frac{16}{28}}$$

A	B	C
8	10	7
D	E	F
4	12	16

8 What integer does this radical expression simplify to?

$$\sqrt{6 \div \frac{9}{6}}$$

A	B	C
5	7	3
D	E	F
2	8	6
