

Ratios - Calculate Total from Item Ratio (From Image)

1 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(3:5)

A	B	C
8	10	15
D		
6		

2 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(2:3)

A	B	C
4	3	11
D		
5		

3 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(2:5)

A	B	C
3	1	6
D		
7		

4 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(3:2)

A	B	C
14	9	5
D		
3		

5 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(5:4)

A	B	C
9	17	13
D		
14		

6 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(5:3)

A	B	C
8	4	1
D		
7		

7 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(5:3)

A	B	C
8	11	12
D		
1		

8 What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(2:5)

A	B	C
16	12	2
D		
7
