

## Ratios - Calculate Total from Item Ratio (From Image)

**1** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(2:5)

A	B	C
4	14	17
D		
5		

**2** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(3:5)

A	B	C
16	22	24
D		
11		

**3** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(2:3)

A	B	C
1	5	2
D		
10		

**4** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(5:3)

A	B	C
16	7	18
D		
19		

**5** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(4:3)

A	B	C
22	17	14
D		
15		

**6** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(2:5)

A	B	C
13	14	15
D		
10		

**7** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(5:2)

A	B	C
20	5	13
D		
14		

**8** What would the TOTAL number of shapes be if they are in the given ratio?

(circles:squares)=(3:5)

A	B	C
18	16	8
D		
21
