

## Ratios - Unit Rates, Find Best Price - Fractions

**1**

|                              |   |   |   |
|------------------------------|---|---|---|
| 1 $\frac{3}{4}$ kg<br>\$6.00 | P | Which option has the lowest price per kg? |   |
| 1 $\frac{7}{8}$ kg<br>\$7.00 | Q | A   | B |
|                              |   | P   | Q |

**2**

|                            |   |   |   |
|----------------------------|---|---|---|
| $\frac{3}{8}$ kg<br>\$1.75 | P | Which option has the lowest price per kg? |   |
| $\frac{1}{2}$ kg<br>\$0.75 | Q | A   | B |
|                            |   | P   | Q |

**3**

|                            |   |   |   |
|----------------------------|---|---|---|
| $\frac{3}{8}$ kg<br>\$7.25 | P | Which option has the lowest price per kg? |   |
| $\frac{1}{2}$ kg<br>\$8.25 | Q | A   | B |
|                            |   | P   | Q |

**4**

|                              |   |   |   |
|------------------------------|---|---|---|
| 1 $\frac{1}{2}$ kg<br>\$5.50 | P | Which option has the lowest price per kg? |   |
| 1 $\frac{5}{8}$ kg<br>\$6.50 | Q | A   | B |
|                              |   | P   | Q |

**5**

|                            |   |   |   |
|----------------------------|---|---|---|
| $\frac{1}{2}$ kg<br>\$2.50 | P | Which option has the lowest price per kg? |   |
| $\frac{3}{8}$ kg<br>\$3.50 | Q | A   | B |
|                            |   | P   | Q |

**6**

|                              |   |   |   |
|------------------------------|---|---|---|
| 1 $\frac{7}{8}$ kg<br>\$6.75 | P | Which option has the lowest price per kg? |   |
| 2 kg<br>\$5.75               | Q | A   | B |
|                              |   | P   | Q |

**7**

|                            |   |   |   |
|----------------------------|---|---|---|
| $\frac{3}{4}$ kg<br>\$7.75 | P | Which option has the lowest price per kg? |   |
| $\frac{5}{8}$ kg<br>\$8.75 | Q | A   | B |
|                            |   | P   | Q |

**8**

|                              |   |   |   |
|------------------------------|---|---|---|
| 1 $\frac{5}{8}$ kg<br>\$7.00 | P | Which option has the lowest price per kg? |   |
| 1 $\frac{1}{2}$ kg<br>\$6.00 | Q | A   | B |
|                              |   | P   | Q |
