## 1

In geometry the position in the middle that is the same distance from all points on the edge is called what?
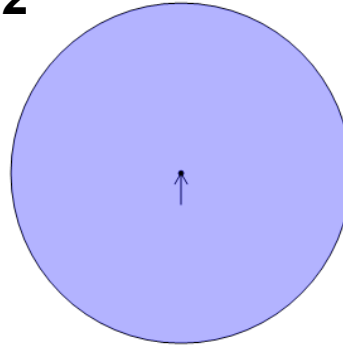

| A	
center	
B	
cantilevered	

2

In geometry the position in the middle that is the same distance from all points on the edge is called what?
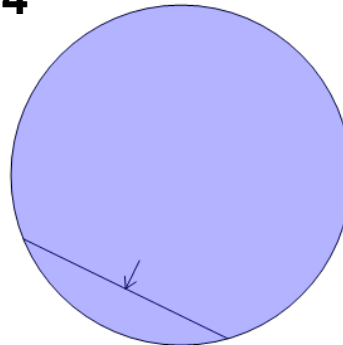

A	B
celestial	center

3

In geometry a line from edge to edge that goes through the center is called what?

A	B
doglegged	diameter

4

In geometry a line from edge to edge that does not go through the center is called what?

A	
chord	
B	
cantilevered	

5
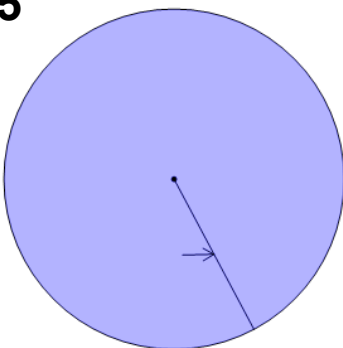

In geometry a line from the center to the edge is called what?

A	B
revelry	radius

6
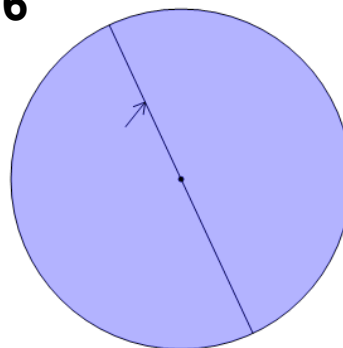

In geometry a line from edge to edge that goes through the center is called what?

A	B
diameter	drafty

7
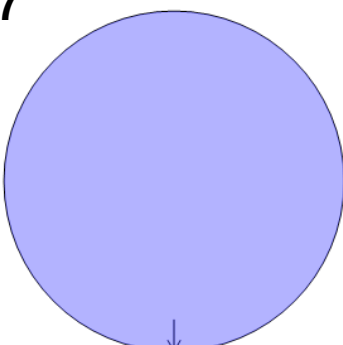

In geometry the outer edge of the circle is called what?

A	
celestial	
B	
circumference	

8
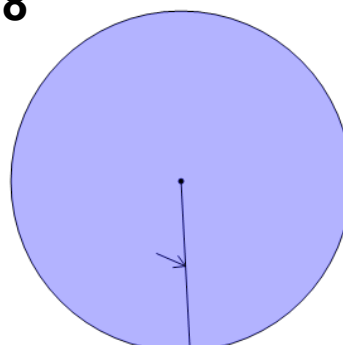

In geometry a line from the center to the edge is called what?

A	B
radius	rheumatoid
