

Slope - Find Equivalent - Slope Zero Intercept Form to Fraction Slope

<p>1 What slope would this line equation have</p> $y = 5x$	<p>A</p> $m = -5$	<p>B</p> $m = 5$	<p>C</p> $m = \frac{1}{5}$	<p>2 What slope would this line equation have</p> $y = \frac{1}{2}x$	<p>A</p> $m = \frac{2}{2}$	<p>B</p> $m = -2$	<p>C</p> $m = \frac{1}{2}$
<p>3 What slope would this line equation have</p> $y = \frac{1}{5}x$	<p>A</p> $m = \frac{1}{5}$	<p>B</p> $m = -5$	<p>C</p> $m = \frac{5}{2}$	<p>4 What slope would this line equation have</p> $y = 1x$	<p>A</p> $m = -1$	<p>B</p> $m = \frac{1}{2}$	<p>C</p> $m = 1$
<p>5 What slope would this line equation have</p> $y = 2x$	<p>A</p> $m = \frac{2}{2}$	<p>B</p> $m = \frac{1}{2}$	<p>C</p> $m = -2$	<p>6 What slope would this line equation have</p> $y = \frac{1}{3}x$	<p>A</p> $m = \frac{3}{2}$	<p>B</p> $m = \frac{1}{3}$	<p>C</p> $m = -3$
<p>7 What slope would this line equation have</p> $y = \frac{1}{4}x$	<p>A</p> $m = \frac{1}{4}$	<p>B</p> $m = -4$	<p>C</p> $m = \frac{4}{2}$	<p>8 What slope would this line equation have</p> $y = 4x$	<p>A</p> $m = 4$	<p>B</p> $m = \frac{4}{2}$	<p>C</p> $m = -4$
					<p>D</p> $m = \frac{1}{4}$
