Triangle Classification - Angles - First Time
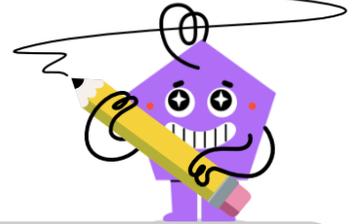

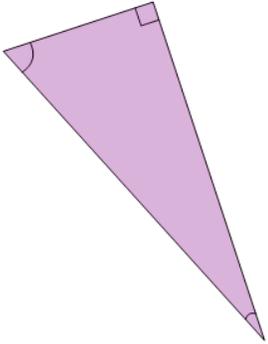

1

In geometry, what's the name for a triangle where one of the angles is equal to 90°?

| A	B
Rostrum	Right

2

In geometry, what's the name for a triangle where one of the angles is more than 90°?

A	B
Obtuse	Opportunity

3

In geometry, what's the name for a triangle where one of the angles is equal to 90°?

A	B
Rheumatoid	Right

4
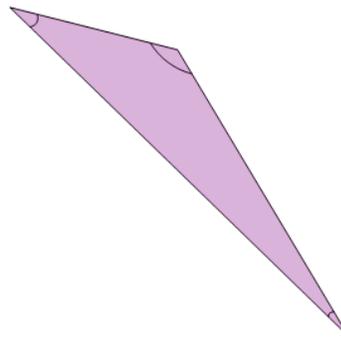

In geometry, what's the name for a triangle where one of the angles is more than 90°?

A	B
Obtuse	Orangutan

5
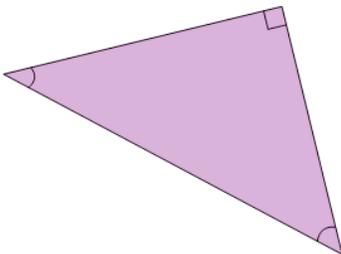

In geometry, what's the name for a triangle where one of the angles is equal to 90°?

A	B
Right	Revelry

6
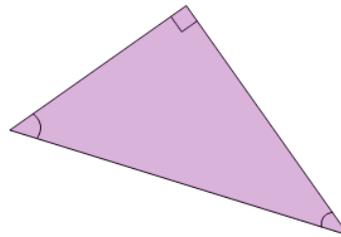

In geometry, what's the name for a triangle where one of the angles is equal to 90°?

A	B
Roving	Right

7
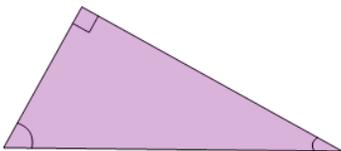

In geometry, what's the name for a triangle where one of the angles is equal to 90°?

A	B
Right	Ramshackle

8
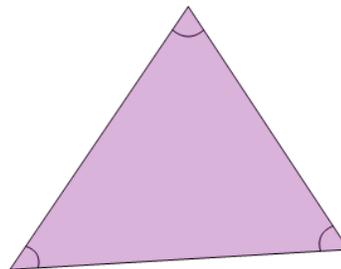

In geometry, what's the name for a triangle where all angles are less than 90°?

A	B
Acute	Ardvark
