

Trigonometry (Unit Circle) - Labeling Angles Radians to Degrees (90s)

1

How many degrees is this angle
($180^\circ = \pi$ radians)?

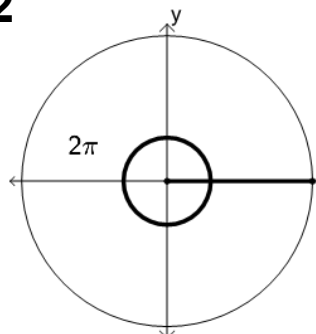

A

315°

B

270°

2

How many degrees is this angle
($180^\circ = \pi$ radians)?

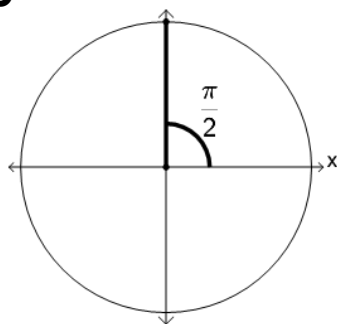

A

360°

B

270°

3

How many degrees is this angle
($180^\circ = \pi$ radians)?

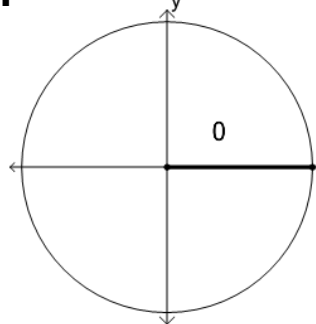

A

90°

B

60°

4

How many degrees is this angle
($180^\circ = \pi$ radians)?

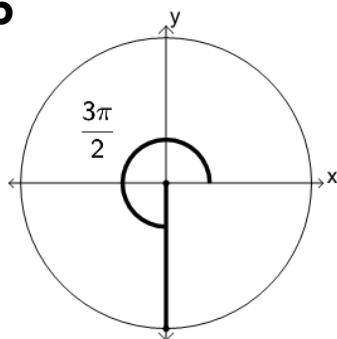

A

90°

B

0°

5

How many degrees is this angle
($180^\circ = \pi$ radians)?

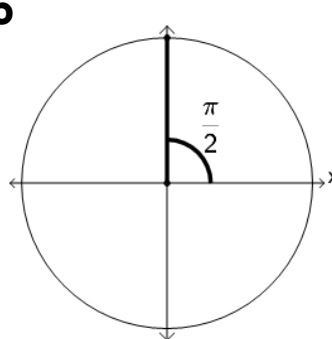

A

270°

B

210°

6

How many degrees is this angle
($180^\circ = \pi$ radians)?

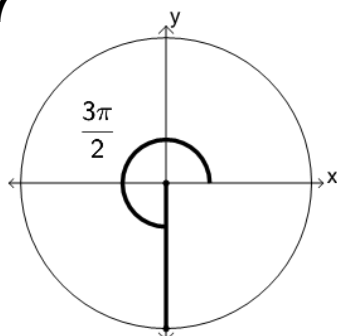

A

90°

B

120°

7

How many degrees is this angle
($180^\circ = \pi$ radians)?

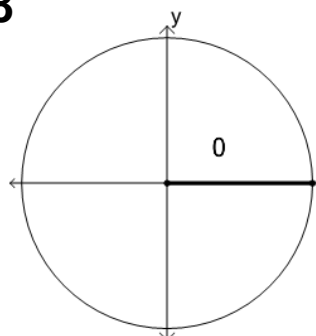

A

300°

B

270°

8

How many degrees is this angle
($180^\circ = \pi$ radians)?

A

0°

B

30°
